**Mpatapo - Knot of Reconciliation**

**\*\*\* Peacebuilding \*\*\***

This is a binding.... a Mpatapo knot of reconciliation -- which makes binds it -- as you can see by the domain name -- to the moral agency of your firm's name. This can indeed be issued under a persons individual name as well. To understand moral responsibility... it is not too complicated -- not rocket science as they say.

What is written below reflects upon a new "information theory" standard within the science field of memetics. You may have never heard of the science that doesn't mean does not exist.

On Introduction to Standards, this is written by a man who died of HIV related causes in 1994. He has 3 separate AIDS quilt panels under his name. He has great awards achievement and recognition including holding an Emmy in documentary film. During his life of activism, he has appeared before Congress on the subject of censorship.

The essay he wrote two years before his death was written in Oakland California where he considered the East Bay his home.

However that may be, he chose the scholar location here in this state of [colorado.edu](http://colorado.edu) to the immortal placement of his essay called:

Introduction to Standards V5N1

By Marlon Riggs.

It is a prerequisite to bring this forward into view before all other things associated to this Grievance Procedure address of Client #12153 James Driskill can proceed with details of the who what why and how – of the circumstances documented to hold his case management in not suspended status as declared from agency but actually failure status as declared by client.

You may click title link above to read the essay directly from the Colorado.edu assigned world view placement or you may listen to a spoken text narrative of the entire essay.

You may also select credits or importance of statements in this essay as it is called here to bring into focus and priorities.
